

RPA & Business Process Automation in JDE using AtomIQ & Orchestrator

Wed, Sep 23, 2020 1:00 PM - 2:00 PM EDT

[Show in My Time Zone](#)

The opportunities to implement Attended & Unattended Robotic and Business Process Automations across your business are virtually unlimited:

- Calculate Freight Charges based on Order Information (Quantity, volume, size, weight, location, date)
- Improve End User Experience for CSRs, Purchasing & Quality Managers, Planners, Controllers, etc
- Enable Alert, Analyze & Act framework for all users without having OneView Foundation licensing
- Eliminate Production Capacity Constraints using Forward Scheduling with PlanIQ (Add-On)
- And so many more

Through customer case studies and demos, learn how AtomIQ's framework empowers your business to automate complex and redundant steps by initiating critical business events in real-time. We'll also explore how to leverage both AtomIQ and Orchestrator to speed up the pace of your business and enable disparate systems can talk to each other and dynamically go about their tasks without having to wait for human intervention, thereby cutting costs and saving time better invested elsewhere.

This demo & session is co-hosted with the Houston Users Group (HUG) and open to all JD Edwards customers in the Houston regional area. Please visit <https://houstonusersgroup.org/> for details additional details.
